

Powerful Ingredients Work in Combination

Açai. This miracle food contains powerful antioxidants and anthocyanins, as well as a naturally occurring array of essential fatty acids, amino acids and plant sterols.

Pomegranate. The total antioxidant activity of pomegranate juice polyphenols was measured three times higher than red wine and green tea.

Cranberry. Cranberry contains a wide variety of compounds, but proanthocyanidins may be responsible for their beneficial effects on the urinary tract.

Blueberry. The USDA Human Nutrition Center ranked blueberries as the No. 1 antioxidant over 40 fruits and vegetables tested.

Elderberry. Elderberry may stimulate the production of cytokines, compounds that play a role in the immune response system.

The açai berry has been recognized as the world's No. 1 superfruit.

About Synergy WorldWide

Synergy WorldWide, led by Founder and CEO Dan Higginson, is a world leader in health and anti-aging products. The highly capable team of executives has more than 70 years of combined experience in the network marketing industry and the determination it takes to achieve success in this industry.

Since Synergy was founded in 1999, it has established a proven track record of success in markets around the world. Synergy WorldWide is a division of Nature's Sunshine Products (NSP), a respected debt-free company with more than 35 years in the herbal-health industry.

Fighting the Free Radical Threat

Free radicals pose a threat to our health and well-being. They attack our cells thousands of times a day, opening the door to long-term, degenerative health concerns and contributing to the aging process.

Free radicals damage the cell by causing oxidation—the same process that makes nails rusty and apple slices brown. Research has shown that the most effective way to defend against free radical damage is by boosting the body's immunity with antioxidants. The açai berry and other fruits found in Mistica are natural sources of anthocyanins and other antioxidants, which can neutralize harmful free radicals before they cause damage.

The OxiScore Antioxidant Test

A recent study looked at the effect of Mistica consumption in a general population that included smokers, diabetics and obese individuals.

The test subjects drank two daily servings of Mistica for three weeks

and were then measured using the OxiScore test, which determines free radical activity. The results were impressive.

Approximately 80 percent of all the subjects showed a decrease in free radical activity, and the group overall experienced a 43 percent reduction in free radical cell damage.

“Many health issues are affected by free radical damage, and the best way that we have found to reduce this damage is to consume good foods and take supplements such as Mistica that contain powerful antioxidants. Antioxidants truly have the power to boost the body's immunity and supercharge our health.”

—C. Norman Shealy, M.D., Member, Synergy Medical Advisory Board

Anthocyanin Comparison

Anthocyanins impart color to plants that provide powerful antioxidant protection

*This test was conducted by a reputable, independent lab with no financial connection to Synergy WorldWide. We measured Mistica's effectiveness against other leading liquid nutritional supplements containing blends of fruits such as noni, açai, goji, and mangosteen.

With its unique combination of antioxidants, anthocyanins and essential fatty acids, Mistica fights free radical damage better than any fruit blend supplement on the market.

Including at daily serving of Mistica in your nutritional regime helps to enhance vitality, while supporting the immune system and cardiovascular health.

Mistica fruit blend contains naturally occurring levels of:

- **Antioxidants** to help counter cell inflammation and premature aging.
- **Anthocyanins** to support the cardiovascular system.
- **Essential fatty acids** to aid in digestive tract function.
- **Phytosterols** to help maintain normal cholesterol levels.
